

Capability Statement

Secure Solutions. Mission-Critical Environments. Backed by **40 years** of software innovation and client satisfaction.

// CORE COMPETENCIES

- ✓ Full-stack software development for CUI, classified, and other sensitive network environments
- ✓ Secure Software Development Lifecycle (SDLC), DevSecOps, and technical project management
- ✓ Application modernization for enterprise networks, including secure cloud enclaves and on-premise infrastructures
- ✓ Design and implementation of Zero Trust Architecture
- ✓ AI/ML integration for new and legacy applications
- ✓ Cybersecurity assessments, threat modeling, and vulnerability analysis for high-assurance systems
- ✓ Streamlining workflows and process automation tools for enhanced operational efficiency and mission readiness
- ✓ Compliance documentation and bodies of evidence in support of system accreditation
- ✓ Consulting for classified infrastructure management, resource planning, and tech refresh planning

// CORE CAPABILITIES

- ✓ **Cleared personnel** with operational experience across classified networks (SIPRNet, JWICS, etc.)
- ✓ Secure apps **rapidly deployed** to secure cloud platforms (AWS-TS, Azure GovCloud, C2S, etc.)
- ✓ **Cybersecurity and IT consulting** for the DoD, IC, and Defense Industrial Base clients
- ✓ Comprehensive **documentation** for ATO packages, including SSPs, POA&Ms, SCTMs, and Audit readiness
- ✓ **Flexible support** model for training, sustainment, maintenance, and operational readiness

// WHY PATHFINDER

Focus

100% dedication to innovation and efficiency in the secure environment.

Talent

Expert developers sharing a passion for strategic problem-solving.

Communication

Direct access to the team—no handoffs or delays.

Experience

Deep familiarity with the challenges unique to classified operations.

Institutional knowledge

Backed by 40 years of custom app development.

Speed

Focused, agile teams for rapid development and delivery.

COMPANY DATA

Service-Disabled Veteran-Owned Small Business

Security-first

Compliance integrated in every phase of software development.

Client focus

We start by listening—real solutions begin with understanding.

Cost

Smaller teams, faster decisions, less overhead.
